KIOWARE LITE

KioWare Lite provides **vital lockdown security** for browser-based applications, restricting users from accessing the OS and desktop, and allowing customization to **limit Internet access.** The software, completely configurable by you, wraps around existing browser applications, offering **protection** from malicious or unintentional attacks on your kiosk.

KIOWARE LITE FEATURES INCLUDE:

- Lockdown browser, desktop and OS
- Keyboard filtering
- Domain/page blocking - allow or revoke lists
- Custom navigational toolbar skins
- Pop-up window control
- Virtual keyboard
- Attract screen generation
- Clearing of cookies, cache, and print queue at session end
- Application resetting
- Can run the OS as a shell
- Remote XML configuration
- User session management
- Run automatic logoff script
- Automatic printer retraction
- Hardware/Software watchdog
- File download blocking
