

KioWare Lite provides **vital lockdown security** for browser-based applications, restricting users from accessing the OS and desktop, and allowing customization to **limit Internet access**. The software, completely configurable by you, wraps around existing browser applications, offering **protection** from malicious or unintentional attacks on your kiosk.

KIOWARE LITE FEATURES INCLUDE:

- › Lockdown browser, desktop and OS
- › Keyboard filtering
- › Domain/page blocking - allow or revoke lists
- › Custom navigational toolbar skins
- › Pop-up window control
- › Virtual keyboard
- › Attract screen generation
- › Clearing of cookies, cache, and print queue at session end
- › Application resetting
- › Can run the OS as a shell
- › Remote XML configuration
- › User session management
- › Run automatic logoff script
- › Automatic printer retraction
- › Hardware/Software watchdog
- › File download blocking

The toolbar you create in Kioware enables users to navigate your application, replacing Internet Explorer buttons and displaying the application full screen.

The Toolbar Editor allows you to create custom multiple toolbars and controls.
